

Air1 is needed in the walla walla valley. It is the only station that plays Christian Rock. We do have a local station, but it does not attract the teenage/young adult group. My 14, and 17 year olds listen to this station almost exclusively. Before Air1 was available, the rock style of music that was available was trash. My kids have better attitudes, are easier to get along with. They know the words to these songs and I am proud to hear those words from their mouths. We have several local Christian stations that are partial music, mostly talk, sermons, infomercial, etc. I beleive that the service that Air1 provides is needed in our town. Many of my childrens friends have been influenced to change their own music preferences. These kids were never against Christianity, but if the only music available was hymns they were not going to bother listening. I love this station! I am 41 years old and I listen to it exclusively. I have several friends that have been impressed with the programming style. walla walla needs this station to be available to us. Our community is very conservative, the older generation that has the money, controls our community. Don't take away the hope we have in this station.
